IT Security initiatives usually focus on the mitigation or remediation of known risks. With cyber threats on the rise – both in comprehensiveness and quantity – we believe that a **continuous improvement of your company's IT security maturity level is a key success factor** to protect your company. With our Transformation Management expertise, we support you in designing and executing long-term IT security programs – placing the people at the center of our activities!

IT Security Transformation Areas

- 1 What is important for your company, and how will you implement the solution?
- 2 How will you incorporate business requirements into the central strategy, and how will these be operated?
- 3 In which governance framework will you run the transformation, and how will you manage the execution?
- 4 How will you raise awareness and develop people to IT Security experts?

WHY CHOOSE US

-  **We have a key competence in global transformations:** Supporting over 100 projects we have long-term experience with global business transformations.
-  **We understand the specifics of IT and OT security:** Not being experts for the technical implementation of ITS solutions, we do understand org. challenges and know how to overcome them.
-  **We believe people are the key success factor:** Solutions and processes are just as good as the employees dealing with them. We know how to make people to the forefront of your cybersecurity strategy and therefore to active participants.

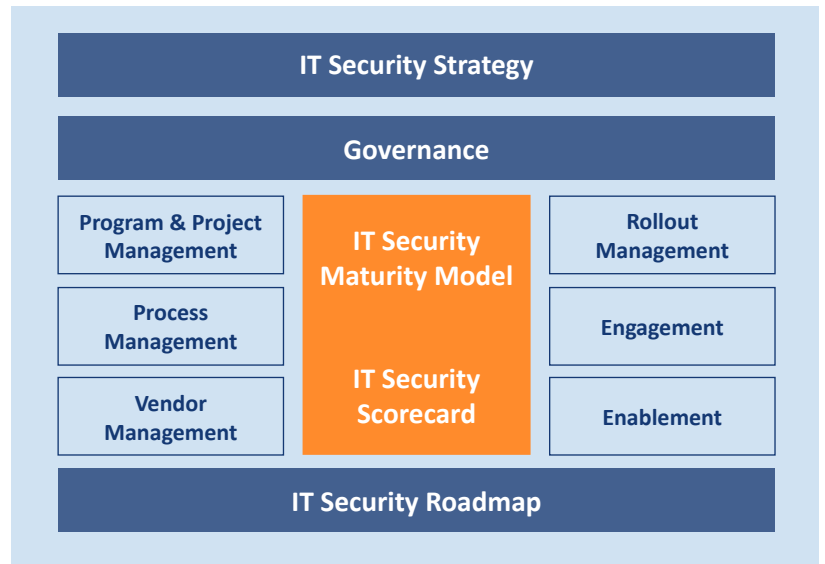

OUR IT SECURITY TRANSFORMATION APPROACH AT A GLANCE

We will accompany you from the start until reaching the defined goals of your transformation.

Our IT Security Transformation Canvas focuses on the key aspects to transform your organization. It will help changing people's behavior, implementing new technologies and gain appropriate capabilities within your IT or OT organization.

Centerpiece is the **IT Security Maturity Model**, which will act as guideline during the transformation and which will allow you to make IT Security measurable. It incorporates **state-of-the-art IT security requirements** defined per transformation stage and translates those into a **company specific score**. This way you will be able to define and steer your transformation.

Together with you we will adapt our proven approach to your company's specifics.

LET US SHARE SOME INSIGHTS FROM SUCCESSFUL PROGRAMS...

Business Integration

Understanding and respecting the business needs and transferring them into aligned processes and standards are key for sustainable and efficient solutions!

Performance Measurement

Measurable goals will help you gaining the support of all stakeholder groups. It will keep people motivated and will help senior management taking the right decisions!

Engage & Enable

The right mindset amongst all employees and the constant development of key resources is essential!

PROJECT EXAMPLES

IMPLEMENTATION OF A GLOBAL PRODUCTION IT SECURITY PROGRAM

SCOPE

Execution of a Production IT Security transformation program for > 100 sites in 29 countries and 14 languages

OUTCOME

- Establishment of an IT Security Maturity model and Scorecard
- Implementation of a new IT Security role in all sites
- Setup of a global IT security community and comprehensive training catalogue
- Implementation of IT Security solutions (remote maintenance, incident response, backup mgmt. etc.)

DESIGN AND IMPLEMENTATION OF AN IT SECURITY ONLINE GAME

SCOPE

State-of-the-art way of transporting knowledge and skills to keep employees engaged and raise awareness

OUTCOME

- Intuitive and appealing game concept
- Replicate everyday life dilemmas and trigger a re-evaluation
- Effective method to learn and practice secure behavior
- Awareness and training for main security topics (e.g. Password Security, Phishing, File exchange, clean desk)

IMPLEMENTATION AND MANAGEMENT OF A GLOBAL PHISHING CAMPAIGN

SCOPE

Enforcement of a global Phishing campaign in more than 90 countries

OUTCOME

- 2 global campaigns per year
- Additional local campaigns in 100+ countries (risk-based approach)
- In 2018, approximately 250,000 test Phishing emails were sent
- During first campaign, more than 30 % of employees are susceptible
- Raise awareness of employees to report suspicious emails
